Subscription Information

The **Advances in Concrete Construction**, *An International Journal* is published 4 times a year in 2013. The basic subscription price (print) for 2013 including postage by surface mail is *US\$315* for institutional subscription and *US\$119* for personal subscription. For delivery by air mail, add *US\$30*. **The access to online version of the journal is complimentary for the first two years.** Subscription orders and/or enquiries should be sent to Techno-Press, P.O. Box 33, Yuseong, Daejeon 305-600, South Korea. Fax: +82-42-350-8450, e-mail: technop1@chol.com

Aims and Scope

The *Advances in Concrete Construction (ACC)*, *An International Journal*, aims at highlighting research, development and innovation in Concrete Construction, focusing all relevant fields, such as: innovative on site and precast methods for new structures, maintenance, repair and strengthening of existing structures, enhanced robustness and seismic performance; numerical modeling and risk analysis, durability and structural health monitoring, and eco-efficient and ultra-high performance cementitious materials

Instructions to Authors

1. Submission of the paper

Authors are asked to submit manuscripts in PDF format electronically through the Techno-Press electronic Manuscript Upload System (TeMUS) (<http://www.techno-press.org/papers>). If you have difficulties in using TeMUS, please contact us at; [technop1@chol.com]. The system is also conveniently used to check the status of submitted papers.

2. Preparation of the manuscript

General: The manuscripts should be in English and typed with double line spacing on single side of A4 paper. Submitted papers will be published in three categories, i.e., 1) Regular Technical Papers, 2) Review Papers and 3) Discussions. The first page of an article should contain; (1) a title which reflects the contents of the paper, (2) all the name(s) and affiliation(s) of author(s), (3) name and e-mail address of the corresponding author, (4) an abstract of 100~250 words, (5) 5-10 keywords at the end of the abstract, and (6) footnote. The paper should be concluded by the proper conclusions which reflect the findings in the paper. The normal length of the research paper should be about 16-20 journal pages. There will be no page charges if the length of the paper is within the page limit. Authors are advised to check more details in the Appendix of Instructions to Authors; (<http://www.techno-press.org/papers/instruction.php>).

Tables and figures: Tables and figures should be consecutively numbered and headed with short titles. They should be referred to in the text as Fig. 1, Table 2, etc. Originally drawn figures and glossy prints of photographs should be provided in a form suitable for photographic reproduction and reduction in the journal. A separate list of captions for illustrations should be provided.

Units and mathematical expressions: It is desirable that units of measurements and abbreviations should follow the Systeme Internationale (SI). The numbers identifying the displayed mathematical expression should be placed in the parentheses and referred to in the text as Eq. (1), Eq. (2).

References: The text should include a list of references which reflect the current state of technology. The references should be prepared in accordance with the guidelines in the Appendix of Instructions to Authors; (<http://www.techno-press.org/papers/instruction.php>).

3. Review

All the submitted papers will undergo a peer-review process, and those papers positively recommended by at least two expert reviewers will be finally accepted for publication in the Techno-Press Journals, after any required modifications are made.

4. Proofs

Proofs will be sent to the corresponding author to correct any typesetting errors. Alterations to the original manuscript will not be accepted at this stage. Proofs should be returned within 48 hours of receipt. not returned within 48 hours, "No need of correction" is presumed.

5. Copyright

Submission of an article to any of the Techno-Press Journal implies that it presents the original and unpublished work, and not under consideration for publication elsewhere. On acceptance of the submitted manuscript, it is implied that the copyright thereof is transferred to the Techno-Press. The Transfer of Copyright Agreement may also be submitted.

Forthcoming Articles

Tentative titles of forthcoming papers

□ **D. Allaix, V. I. Carbone, G. Mancini** Reliability-based safety format for non linear analysis of concrete structures; □ **P. G. Malerba** Nondeterministic time dependent behaviour of free cantilevered and cable stayed prestressed concrete bridges; □ **K. S. R. Su** A unified design procedure for preloaded rectangular RC columns strengthened with post-compressed plates; □ **Z. Ge** Property of high-performance concrete with recycled clay brick; □ **C. C. Yang** A multi-phase model for predicting the effective chloride migration coefficient of ITZ in concrete; □ **V. G. Papadakis** Service life prediction of a reinforced concrete bridge under chloride induced deterioration - Failure scenarios and protective measures; □ **Y. F. Rashed, M. E. Mobasher, W. M. El-Haddad** A boundary element based software package for structural analysis of building slabs and foundations; □ **F. Evangelista, J. R. Roesler, C. A. Duarte**, Analysis of concrete slab crack growth potential under non uniform support conditions; □ **Odd E. GjØrv** Durability design and quality assurance of important concrete infrastructure; □ **P Silva, J. Brito** Electrical resistivity and permeability of Self Compacting Concrete with incorporation of fly ash and limestone filler; **D. Dias-da-Costa, J. Alfaiate, B. Sluys** Strong discontinuities: from interfaces to conforming embedded formulations; □ **D. Zwicky** Bond and ductility – a theoretical study on the impact of construction details; □ **J. Firmo, J. RamØa Correia** Fire behavior of CFRP-strengthened RC structures; □ **R. Caspeele, L. Taerwe** Numerical Bayesian updating of prior distributions for concrete strength properties considering conformity control; □ **John Cairns** Ultimate strength of continuous beams with exposed reinforcement; □ **L. Neves, D. Frangopol** Bayesian updating in bridge life-cycle analysis □ **Adel E. Abdelnaby** Design concepts implications on the behavior of RC frames subjected to earthquake sequences
